

# Swedish Mission Card

# *The Age of Sail*

## Scenario 2: The Baltic, 1801

### Orders

Your task is to support your alliance partners and help chase the British from the Baltic Sea.

Your 8 ships and 3 frigates combined with the other ships of the alliance present a formidable force, but you need the support of the other members of the alliance to realistically engage the British fleet and hope to win a battle. That cooperation is uncertain.

Further, the state of your fleet is uncertain. It is unlikely you can move the opening turn (you must conduct a special “Swedish Release” die roll); if the roll is unsuccessful, you defend in place the first turn at full strength. Thereafter, you can move freely. Should the British occupy Stockholm, your fleet must withdraw from the alliance i.e. is removed from play.

#### **Decision Point 1**

What are your orders?
